The general outbreak of opposition criticism of the government with regard to the Currie report on conditions within the Army work services, is a healthy sign for Canadian democracy. No attempt was made to minimize the value of the Currie report. In the case of an original report, which somehow or other had got into the hands of the C.C.F., and which differed from that brought before the House, there was no pretence of concealment. On the contrary, the prime minister was quick to admit that Stanley Knowles for his frankness in the matter.

The desire to make the Minister of Defence a scapegoat will fall, as it deserves to fall, since it can be assumed nothing serious will happen in that direction. After all, the debate was held in public for Opposition spokesmen, and they can be relied upon to make the most of their opportunity.

But there are no villains (T) in the case. Simply a bunch of cold crooks, most of whom have already been brought to justice and punished. Much as it is to be deplored, such people are prevalent everywhere and Canada has no monopoly in their numbers. Unfortunately, they appear to obtain greater scope in minor services.

The charge that horses were put on the payroll in the guise of men is almost beyond belief. The average person can get a gap with astonishment at the gall and impudence of such sordid rascals. These fellows were doing no more than to get paid for an almost forgotten past when it required the institution of muster parades to cope with this kind of fraud.

The adjournment for the Christmas vacation put an end to a highly diverting arrangement of departmental etiquette, which was brought into sharper focus by the demand for an early election made by a C.C.F. member. The protest was of course, a gesture, but it had little hope wherewith to nourish it.

GERMAN CHILD SPENDS MOST OF HER EIGHT YEARS IN ATTIC ROOM — Little Baerbel Scholz is shown being examined by a doctor at the Bad Segeberg hospital, in the British zone of Germany after she was discovered locked in an attic room. The eight-year-old youngster, whose condition has been described by doctors as "more animal than human," had been locked in the room for most of her life. Her mother was ashamed of her. One doctor reported that he didn't think the child's condition was entering the best of her. He said there must have been both physical and mental ailments which give the little girl the features of a 13-month-old baby. Baerbel weighs only 18 pounds, is 28 inches tall and can neither speak nor walk.—Central Press Canadian.
